

National Center for Atmospheric Research

Workshop on

Ice Initiation

We invite you to participate in a workshop to discuss the current status and the outlook for future progress in the area of ice initiation in clouds. Future work will include field programs, laboratory experiments, and modeling. The goals of this workshop are to review current knowledge in this area and to develop two or three experiments that can make meaningful progress on the ice initiation problem. This information will form the basis for a Scientific Overview Document (SOD).

7 - 8 June, 2004

hosted by:

The Atmospheric Technology &

The Mesoscale & Microscale Meteorology

Divisions, NCAR
