

Leveraging exascale technology to advance NCAR science within MMM

John Dennis
NCAR/CISL

An institution-wide team was formed to determine the best course of action concerning using exascale technology to advance NCAR's science objectives. The end product of this evaluation was the creation of both a general and laboratory-specific set of recommendations regarding how exascale technology can advance our science objectives. In our presentation, we describe science objectives that are potentially of interest to the MMM community that can benefit from the use of exascale technology. We also provide both NCAR-wide and laboratory specific recommendations to advance the MMM community's use of exascale technologies.

Thursday, 7 September 2023, 2:00pm

Refreshments 1:45pm

Please also join colleagues for refreshments and informal discussion after the seminar until 3:30pm

NCAR-Foothills Laboratory, 3450 Mitchell Lane
FL2-1022, Large Auditorium

Seminar will also be live webcast

<https://operations.ucar.edu/live-mmm>

Participants may ask questions during the seminar via Slido.
